ABOUT

I'm a U.S. Marine veteran that became a self-taught developer, starting in 2013. I'm always eager to learn new things and have had the chance to explore many technologies and work in several different environments. I've attended multiple code camps, security conventions, and developer Meetup events. I'm excited for the future and what it holds for me. I've been a "professional" iOS Developer since 2018.

I read books and watch videos related to Swift and iOS development for fun... and yes, I have an app in the App Store.

HISTORY

5/2018 - Present

iOS Developer @ U-Haul International

Performed as one of two main iOS developers working on the enterprise application for all U-Haul employees. Supported several "legacy" mobile applications used by all Area Field Managers within the organization through bug fixes and updates.

1/2018 - 5/2018

iOS Developer @ *Freelancer*

Consulted with small business leaders, contributing input and guidance in the development of iOS applications.

10/2016 - 5/2018

Network Administrator @ *Rockford Corporation*

Worked in a small IT Department, which allowed me to "wear many hats". Devised solutions to automate and streamline the workflow within the department.

EDUCATION

2019

Certificate of Distinction
100 Days of Swift by Hacking with Swift

2018

The Complete iOS App Development Bootcamp
London App Brewery

2016

B.S. Information Systems Security
University of Phoenix

2014

Certified ScrumMaster
Scrum Alliance

SKILLS

Languages

I've used the following languages:
Swift, Python, HTML, CSS, JavaScript

Agile

I enjoy working in agile environments, such as:
Scrum, Kanban

Tools

I'm quick to learn new tools and systems. Some applicable examples are:
Git, GitHub, Bitbucket, JIRA, Sketch
